Journalist	15/06/2021	<p>Coronavirus – COVID-19</p> <p>This is a Freedom of Information access request, under the Freedom of Information Act 2014.</p> <p>Please provide me with a full, accurate and complete list of records, held by the Health Services Executive (HSE) or under the authority of the HSE which describes the isolation of the SARS-COV-2 virus (Coronavirus COVID-19), taken directly from a symptomatic patient with COVID-19, where the sample was not combined or mixed with any other source of genetic material (such as, for example, monkey kidney cells or cancer cells), thereby eliminating contamination as a possible alternative source of sampling.</p> <p>Please note that the word “isolation” is used here in the normally understood meaning of that word, namely, the act of separating one thing from another. I am not referring to (and hence not requesting) documents where “isolation” means the preparation of a culture of something else, the performance of an amplification test (e.g. a PCR test which detects only mRNA or DNA), or to the sequencing of anything other than the viral isolate in question.</p> <p>If any records of the HSE match the above description, please provide enough information so that I may identify and access each record with certainty. Please provide also the title, author, date, journal, web link etc. of any document, online or otherwise, recorded on a document held by the HSE or under its authority, which describes the isolation procedure in question.</p>	Refused	13/07/2021
