# Spot cancer early: Lung Cancer

Your chance of survival  
is much better if cancer  
is found early

Symptoms of lung cancer can include:

- A new cough lasting for more than 3 weeks
- A long standing cough that has changed
- Chest infections that keep coming back
- Feeling breathless more than is normal for you
- Weight loss that you can't explain
- Feeling very tired all the time

**Phone your GP  
if you have any of  
these symptoms**
