# BreastCheck

1	<b>KPI Title</b>	HWB37 - % of women offered hospital admission for treatment in BreastCheck host hospital within three weeks of diagnosis of breast cancer
1a	<b>KPI Short Title</b>	Hospital admission offer within 3 weeks of diagnosis
2	<b>KPI Description</b>	Measures whether women diagnosed with cancer are offered treatment in BreastCheck host hospital (St Vincents, Mater, Cork University Hospital, Galway University hospital) within 3 weeks of being informed of their diagnosis of breast cancer. Detailed analysis of client records may be necessary to report this metric.
3	<b>KPI Rationale</b>	Measures quality of service to women with cancer detected at screening. Aims to improve outcomes and minimise anxiety by having surgery in a timely manner. This data relates to women who opt to have treatment at BreastCheck host hospitals. Clients who opt to have treatment at other hospitals are excluded from this metric.
3a	<b>Indicator Classification</b>	National Scorecard Quadrant: Access & Integration
4	<b>National Target</b>	2024 NSP Target: 90%. This is a cumulative calculation
4a	<b>Target</b>	Performance targets constant over the full year i.e. 90%
4b	<b>Volume Metrics</b>	N/A
5	<b>KPI Calculation</b>	Numerator = No. women offered hospital admission for treatment within 21 days of diagnosis of breast cancer. Denominator = No. women diagnosed with Breast Cancer in the reporting period. Excludes cases where further tests/opinions sought, patient choice to defer or where a woman goes outside BreastCheck for treatment

# BreastCheck

1	<b>KPI Title</b>	HWB35 - % BreastCheck screening uptake rate
1a	<b>KPI Short Title</b>	BreastCheck uptake rate
2	<b>KPI Description</b>	A cohort measurement of the uptake of screening by women whose date of first offered invitation in the current screening round was within the reporting period. These women are followed over time to allow adequate time for taking up their appoint (or second appointment in the round). Includes all women in the eligible population i.e. including age extension. Includes all women in the eligible population aged 50-69
3	<b>KPI Rationale</b>	To maximise the uptake of breast screening among the eligible population. Based on evidence from Randomised Controlled Trials and International best evidence. This level of uptake is required to have an effective reduction in mortality from breast cancer.
3a	<b>Indicator Classification</b>	National Scorecard Quadrant: Access & Integration
4	<b>National Target</b>	2024 NSP Target: 70% . This is a cumulative calculation
4a	<b>Target</b>	Performance targets constant over the full year i.e. 70%
4b	<b>Volume Metrics</b>	N/A
5	<b>KPI Calculation</b>	Numerator = No. of those women who attended screening. Subject to change due to uptake on second invitation, rescheduling etc... Denimonator = No. of women whose date of first offered invitation in the current screening round was within the reporting period.
6	<b>Data Source</b>	BreastCheck database (NBSP) to the National Business Infomation Unit (NBIU) via a cif template
6a	<b>Data Sign Off</b>	Dr. Therese Mooney, Head of Programme Evaluation Service, National Screening Service

## CervicalCheck

1	<b>KPI Title</b>	NSS3 - % of eligible women with at least one satisfactory cervical screening test in a five year period
1a	<b>KPI Short Title</b>	CervicalCheck coverage
2	<b>KPI Description</b>	Measures the proportion of the known eligible population who have had at least one satisfactory screening test in the five year period defined. Period is based on a five-year screening round. This is a rolling metric updated to the end of the previous quarter. Numerator = no. of unique women aged 25-65 who have had a satisfactory screening test in the previous 5 years, Denominator = no. of unique women aged 25-65 in the population (based on most recent census estimates) adjusted for women who have had a hysterectomy (therefore not eligible for the CervicalCheck programme).
3	<b>KPI Rationale</b>	Measures the coverage of the CervicalCheck programme among the eligible population. Monitors if the programme is reaching the population it serves. Used as International comparator.
3a	<b>Indicator Classification</b>	National Scorecard Quadrant: Access & Integration
4	<b>National Target</b>	2024 NSP Target: 80% . This is a rolling cumulative calculation
4a	<b>Target</b>	Performance targets constant over the full year i.e. 80%
4b	<b>Volume Metrics</b>	N/A
5	<b>KPI Calculation</b>	Numerator = no. of unique women aged 25-65 who have had at least one satisfactory screening test in the previous 5 years, Denominator = no. of unique women aged 25-65 in the population (based on most recent census estimates) adjusted for women who have had a hysterectomy (therefore not eligible for the CervicalCheck programme)

# BowelScreen

1	<b>KPI Title</b>	HWB46 - % BowelScreen screening uptake rate
1a	<b>KPI Short Title</b>	BowelScreen Uptake
2	<b>KPI Description</b>	A cohort measurement of the uptake of bowel cancer screening by eligible men and women whose date of first offered invitation in the current screening round was within the reporting period. These clients are followed over time to allow adequate time for taking up their reminder invitation in the round. Subject to change due to uptake on reminder invitation etc.
3	<b>KPI Rationale</b>	To maximise the uptake of bowel screening among the eligible population
3a	<b>Indicator Classification</b>	National Scorecard Quadrant: Access & Integration
4	<b>National Target</b>	2024 NSP Target: 45%. This is a cumulative calculation
4a	<b>Target</b>	Performance targets constant over the full year i.e. 45%
4b	<b>Volume Metrics</b>	N/A
5	<b>KPI Calculation</b>	Numerator = No. of those clients who completed a satisfactory FIT test. Subject to change due to uptake on reminder invitation etc. Denominator = No. of clients whose date of first offered invitation to take part in BowelScreen in the current screening round was within the reporting period.
