

23rd February 2023

Circular 012/23

Exempt Medicinal Products (Unlicensed Medicines) Arrangements

Dear Pharmacist,

You will be aware of the legislative provisions in supplying an Exempt Medicinal Product (Unlicensed Medicine), i.e. that it must be supplied in response to an unsolicited bona fide request from a Medical Practitioner. I refer to Circular 39/16 and the protocol for supply of Exempt Medicinal Product (EMPs) under Community Drug Schemes in this regard.

The list of EMPs has been reviewed by the HSE Medicines Management Programme (MMP) and reimbursement support continues on the basis of the unmet clinical need.

A copy of the list, which is effective from 1st March 2023 is enclosed. Where medicines on this list are prescribed for those with full medical card (GMS) eligibility, pharmacies can dispense and claim for the products electronically using the codes specified, submitting them in the normal manner with your monthly claims.

In addition, the attached list of products with their claiming codes should be used for claims under the DPS and, where applicable, LTI and HAA schemes.

For reimbursement support under Community Drug Schemes, EMPs must be Consultant initiated. However, the HSE will accept a GP prescription where the Dispensing Pharmacist is satisfied that the product has been Consultant initiated.

Prescribers and Pharmacists must ensure that the usage of EMPs is minimised to those situations where no suitable licensed alternative is available for the patient and should recognise the importance of using a licensed alternative where possible. Where an EMP needs to be prescribed, the Prescriber and Pharmacist are asked to ensure the patient is made aware that their medicine is not licensed in Ireland.

The HSE is satisfied that Pharmacists can access the EMPs on the list at the Reimbursement Price outlined from the suppliers listed against them for a period of 24 months. Due to the nature of EMPs and supply arising from various jurisdictions in different brands, the EMPs are listed by non-proprietary name in alphabetical order. The maximum amount the HSE will reimburse is the reimbursement price specified on the enclosed list. If pharmacies choose to use alternative suppliers and are charged a higher price, payment will be at the discretion of the HSE in accordance with the Health (Pricing and Supply of Medicinal Goods) Act 2013.

However, for products dispensed in March and April 2023 only, the HSE will accept invoices for EMPs already acquired at a price different to those listed. The following will apply for these claims:

1. For GMS patients, these claims must be submitted to the Local Health Office for payment through the existing Discretionary Hardship Arrangements. A copy of the relevant invoice is required and should accompany those claims.
2. For DPS, LTI and HAA patients, these claims should be submitted through the established arrangement using '777xx' codes directly to the PCRS. A copy of the relevant invoice is required and can be submitted to PCRS.PPUInvoices@hse.ie.

Unfortunately, as the EMP market fluctuates it is not possible for the HSE to obtain an agreed reimbursement price for all commonly prescribed EMPs where there is an unmet clinical requirement.

Please note that EMPs not included on this list, where prescribed for a person with GMS eligibility by a Hospital Consultant, will require individual approval under Discretionary Hardship Arrangements. It is intended that individual approval for items not on the Reimbursement List will be centralised from the Local Health Offices to PCRS in the coming months via an online application portal through the Secure Scheme Checker. Further communications will be issued on this development in due course.

If you have any further queries in relation to the information provided, please contact PCRS.ExemptMed@hse.ie.

Yours faithfully,

A handwritten signature in blue ink, appearing to read 'Shaun Flanagan', with a stylized flourish at the end.

Shaun Flanagan,
Primary Care Reimbursement Service

Supply of Exempt Medicinal Products under the GMS and Community Drugs Schemes

It is recognised that in certain exceptional circumstances the supply of unauthorised medicinal products will be necessary under the GMS and Community Drugs Schemes. The circumstances in which payment for such medicinal products will be made are as follows:

- (a) The medicinal product concerned should be an 'allopathic' medicinal product which has been industrially produced and which is appropriate for use in the community
- (b) The medicinal product concerned should be such that no authorised medicinal product of essential similarity is available for prescription and supply under the Community Drug Scheme concerned
- (c) The prescription concerned should be written or initiated by a medical consultant who is aware of the unauthorised status of the medicinal product concerned and who has informed the patient of the situation
- (d) The dispensing Pharmacist has also informed the patient of the unauthorised status of the medicinal product prescribed and that its quality, safety and efficacy has not been established in this country
- (e) The medicinal product concerned is not advertised or promoted directly to the public
- (f) The application made for reimbursement is accompanied by a copy of the invoice relating to the supply of the medicinal product to the Pharmacist concerned
- (g) If necessary, the application for reimbursement is supported by an explanation of the special circumstances which required the supply of the unauthorised medicinal product
- (h) The cost of the medicinal product concerned should be reasonable in the context of medicinal products ordinarily supplied and used in the community and be of a category which, if it were authorised, would be eligible for reimbursement in the Community Drug Scheme concerned
- (i) The original prescription or a copy thereof, together with appropriate records of supply, is retained in the pharmacy and kept available for review/inspection by the HSE as required
