Circular 001/18

### **Wound Management and Compression Hosiery**

Dear Pharmacist,

The Expert Group for Wound Management Products carried out a national review of Dressings and Aids for Wound Management. Enclosed is a list of Wound Management Products considered as Normal Nursing Needs that would be expected to be available as stock in residential settings. These products will not be approved under Discretionary Hardship Arrangements (Ref: Circular 048/16 - Appendix A). However, Dressings of a more complex nature can be approved under this arrangement.

You are reminded that while Dressings are not available to patients on GMS prescriptions, certain Dressings are provided on the Reimbursement List for GP Stock Orders. A more comprehensive list of Wound Management Products available for GP Stock Orders was published on the Reimbursement List effective 1<sup>st</sup> November 2017. Where there are no local arrangements in place to make supplies through the Public Health Nurse at local level, applications can be submitted under Discretionary Hardship Arrangements for approval supported by a GP prescription.

In order to further reduce the administrative burden to Pharmacists, Compression Hosiery products have been provided with administrative codes effective 1<sup>st</sup> January 2018 (copy of list enclosed). This will mean that where such products are prescribed, they can be dispensed and claimed for electronically. Compression Hosiery will no longer require individual authorisation by the Local Health Office under Discretionary Hardship Arrangements. Reimbursement support is provided for two pairs per calendar year. Claims submitted outside the approved yearly threshold will not be reimbursed. This arrangement applies to medical card holders under the GMS scheme only.

We look forward to your continued co-operation with these arrangements.

Yours faithfully,

Anne Marie Hoey  
Primary Care Reimbursement & Eligibility
